WILLIAM MINO

Senior Data Analyst | Data Analytics Expert

Results-driven Senior Data Analyst with 9 years of experience turning complex eCommerce, product, and business data into actionable insights through end-to-end analytics pipelines. Expertise in SQL, Python, Tableau, Power BI, Excel, and modern BI & AI tools (Cursor, Claude Opus). Skilled in funnel analysis, process optimization, and advanced data analytics. Proven ability to translate complex datasets.

Industries: Automotive, Biotechnology, Public Utilities

Core Competencies*:*

• Funnel & Conversion Analysis • Marketing & Revenue Analytics • Data Modeling
• A/B Testing • Data Analysis & Visualization • Data Cleaning & Transformation
• Dashboards and BI Tools • Big Data & Cloud Tools • Project Management
• Root Cause Analysis • Stakeholder Management • Collaboration & Communication

Technical Proficiencies:

• AWS • Amazon Redshift • Data Pipelines • SQL • Python • Excel
• Tableau • Power BI • Salesforce • SAP • Google Analytics • Claude Opus

Professional Experience

TrueCar - Santa Monica, CA

Senior Analyst 2025 – 2026

- Designed scalable SQL datasets and reporting tables in Amazon Redshift to support automated dashboards and end-to-end business performance tracking.
- Partnered with Product, Sales, and Business stakeholders to evaluate the impact of pricing, incentives, and marketplace changes using statistical analysis and experimentation frameworks.
- Translated complex data into actionable business insights for stakeholders, supporting data-informed decision-making.
- Leveraged AI tools like Cursor and Claude Opus to optimize SQL queries and perform ad hoc data pulls.
- Developed dashboards monitoring program performance, revenue outcomes, and user behavior for operational transparency.
- Streamlined reporting and data cleaning processes, reducing manual effort and accelerating insight delivery.
- Owned reporting for OEM incentive programs generating $7M annually, ensuring accurate tracking, reconciliation, and downstream reporting integrity.
- Delivered insights to regain a key client, recovering $500K in annual recurring revenue through targeted performance analysis.
- Created Python scripts to accelerate data entry and export workflows, enhancing team productivity.

EKN Engineering - Irvine, CA
Data Analyst II 2023 – 2025

- Analyzed operational workflows from data ingestion through final delivery, identifying inefficiencies, data gaps, and process breakdowns.
- Developed dashboards to monitor field crew activities and job changes through app messaging and equipment data, streamlining field operations and driving efficiency and cost savings.
- Built automated tracking and analytics tools using SQL, Excel VBA, Python, and SAP to improve operational visibility and enable data-driven decision-making.
- Supported ad hoc financial and business analyses, enabling strategic decision-making across client-facing programs.
- Conducted root cause investigations for data discrepancies, ensuring confidence in downstream financial and operational reporting.
- Collaborated with cross-functional teams to define KPIs, reporting requirements, and metrics for performance tracking.
- Delivered insights leading to $120K in cost reductions and improved operational efficiency.

Pfizer - La Jolla, CA 2020 – 2022
Scientist

- Contributed to cancer research through advanced data analysis, training junior scientists, and comprehensive data reporting.
- Designed and implemented streamlined processes for data generation, transformation, and visualization, improving accuracy and efficiency.
- Led and coordinated early-stage research projects, performing laboratory work and presenting findings to key stakeholders.
- Utilized project management methodologies to accelerate milestone completion and improve research outcomes.
- Applied automation and algorithmic approaches to optimize high-throughput screening assays, increasing efficiency by 50%.
- Managed and allocated research project budgets ranging from $30,000 to $50,000, ensuring strategic investment in cutting-edge technologies.

Tanabe Research Labs USA, Mitsubishi Tanabe Pharma Corp. - La Jolla, CA 2016 – 2020
Research Associate II

- Conducted research on cancer therapies, successfully integrating research projects into the clinical portfolio.
- Facilitated the advancement of 25% of early-stage cancer research projects.
- Delivered company-wide presentations to communicate research progress and key findings.
- Managed project expenditures, maintaining an annual spending limit of $50,000 while ensuring adherence to budget constraints.

Education:

University of California, Santa Barbara Santa Barbara, CA
Bachelor of Science, Pharmacology

University of California, San Diego San Diego, CA
Data Science and Visualization Bootcamp

Awards:

EKN Engineering – *Q2 Optimization & Cost Reduction Management Award* (2024)
