William Mino

Senior Data Analyst | Analytics Lead | AI & Data Strategy

Results-driven Senior Data Analyst with 9+ years of experience leading large-scale, cross-functional analytics initiatives and building scalable data solutions. Expertise in SQL, Python, R, and cloud platforms (AWS, Snowflake), with strong experience in data engineering, AI/ML applications, and advanced analytics. Skilled in data modeling, forecasting, automation, and enterprise reporting. Proven ability to architect data pipelines, translate complex datasets into strategic insights, and drive measurable business outcomes while mentoring analysts and influencing executive decision-making.

Industries: Automotive, Biotechnology, Public Utilities

Core Competencies*:*

neering & Pipelines • KPI Development & Performance Tracking • Data Governance & Compliance • Advanced Statistical Ana

Technical Proficiencies:

• AWS • Snowflake • Amazon Redshift • SQL • Python • R • Spark • Hadoop • Data Pipelines
• Tableau • Power BI • Excel • SAP • Kinaxis • Machine Learning Frameworks • AI Tools (Cursor • Claude Opus)

Professional Experience

TrueCar - Santa Monica, CA
Senior Analyst 2025 – 2026

- Led the design and deployment of scalable analytics solutions, building robust SQL datasets and data pipelines in Amazon Redshift to support enterprise-wide reporting and decision-making.
- Partnered with Product, Sales, and Business stakeholders to evaluate pricing, incentives, and marketplace changes using statistical modeling and experimentation frameworks.
- Translated complex data into actionable insights to influence strategic decisions and improve business performance.
- Leveraged AI tools like Cursor and Claude Opus to optimize SQL queries, automate workflows, and accelerate ad hoc analysis.
- Developed dashboards tracking KPIs, revenue performance, and user behavior to drive operational transparency.
- Streamlined reporting and data transformation processes, reducing manual effort and improving efficiency.
- Owned reporting for OEM incentive programs generating $7M annually, ensuring data integrity, governance, and accurate reconciliation.
- Delivered insights that recovered $500K in annual recurring revenue through targeted performance analysis.
- Mentored junior analysts on SQL, analytics best practices, and dashboard development.
- Created Python-based automation tools to improve data processing and team productivity.

EKN Engineering - Irvine, CA
Data Analyst II 2023 – 2025

- Led analysis of operational workflows from data ingestion through delivery, identifying inefficiencies and implementing scalable data solutions.
- Developed dashboards to monitor field operations, equipment usage, and job changes, improving efficiency and cost visibility.
- Built automated data pipelines and analytics tools using SQL, Python, Excel VBA, and SAP to enhance reporting and decision-making.
- Performed advanced analysis to identify cost-saving opportunities, contributing to $120K in operational savings.
- Established KPIs and reporting frameworks in collaboration with cross-functional stakeholders.
- Conducted root cause analyses for data discrepancies, ensuring accuracy and reliability of reporting systems.
- Supported strategic initiatives through ad hoc analysis, forecasting, and business modeling.

Pfizer - La Jolla, CA 2020 – 2022
Scientist

- Applied advanced data analysis and statistical techniques to support oncology research and drive data-informed decision-making.
- Designed and implemented efficient data workflows for data collection, transformation, and visualization, improving accuracy and productivity.
- Developed automated and algorithmic approaches for high-throughput screening, increasing efficiency by 50%.
- Led early-stage research initiatives, coordinating cross-functional teams and presenting findings to technical and non-technical stakeholders.
- Mentored junior scientists on data analysis, reporting, and best practices.
- Managed research budgets between $30,000 and $50,000, ensuring optimal allocation of resources.
- Implemented structured data management and governance practices to improve data quality and reproducibility.

Tanabe Research Labs USA, Mitsubishi Tanabe Pharma Corp. - La Jolla, CA 2016 – 2020
Research Associate II

- Conducted data-driven research on cancer therapies, supporting the advancement of early-stage drug development programs.
- Applied statistical analysis and data interpretation to evaluate experimental results and guide research strategy.
- Facilitated the progression of 25% of early-stage research projects into the clinical pipeline.
- Delivered presentations to technical and business stakeholders, translating complex data into clear insights.
- Managed project budgets up to $50,000 while ensuring adherence to financial constraints.
- Collaborated across teams to standardize data collection, reporting, and analysis processes.

Education:

University of California, Santa Barbara Santa Barbara, CA
Bachelor of Science, Pharmacology

University of California, San Diego San Diego, CA
Data Science and Visualization Bootcamp

Awards:

EKN Engineering – *Q2 Optimization & Cost Reduction Management Award* (2024)
